PROJECTS:

Text file based name parser

- Created a program that reads a list of top 100 famous people from a file and asks user to input a name. Program will check to see if inputted name is in the top 20.
- Read the file. Created an if statement to see if user's inputted data was in the top 20 of the list. If name was in top 20, printed that the name was found. If not, then displayed that name was not found.

Calculating duration of a trip

- Created a program in which asks the user to input date of departure, time of departure, and how many miles is the trip, and how fast you are traveling. Then it calculates how long the trip will take and tells you what and estimated date/time of arrival.

Birthday Calculator

- Created a program which asks for your name and birthday, then calculates how old you are and how many days until your next birthday.
